Riad Youness

Engineering student, Computer Science & Applied Maths

> Seeking a **summer 2027 internship** in **data or artificial intelligence**, in football, aviation or space.

Education

MSc-level Engineering Degree, Computer Science & Applied Maths — **2026 – 2029**
Toulouse INP-ENSEEIHT, Toulouse, France

- Courses: probability, optimisation, programming (Ada), applied mathematics

Classes préparatoires MPSI & MP — **2024 – 2026**
Lycée d'Excellence Mohammed VI, Casablanca, Morocco

- Two-year intensive programme in maths, physics and computer science preparing for the French engineering school entrance exams

Moroccan Baccalaureate, Physical Sciences — **2024**
Highest honours (Très Bien), Casablanca

Project

Research project: the travelling salesman problem — **2025 – 2026**
MP preparatory class

- Modelled a road trip across Europe using graph theory
- Implemented and compared 4 methods in Python: brute force, nearest neighbour, 2-opt and simulated annealing
- Analysed the trade-off between solution quality and computing time; applications to logistics and trajectory planning

Experience

Private maths tutor — **2025 – 2026**
One-to-one tutoring

- Identified each student's difficulties, adapted explanations and exercises, tracked progress
- Strengthened teaching skills and the ability to explain complex concepts simply

Volunteering

Distributing meals and blankets to homeless people
Team-based community action

Portfolio
riadyouness.github.io

Location
Toulouse, France

Technical skills

Python — intermediate

Ada — beginner

LaTeX

Mathematics

Probability

Optimisation

Graph theory

Algorithms and heuristics

Languages

French — fluent

English — fluent

Arabic — fluent

Soft skills

Teaching

Teamwork

Perseverance

Commitment

Interests

Club football

Hiking

Aviation and space
